(54) Title: A CONNECTOR FOR DETACHABLY INTERCONNECTING A NUMBER OF STRIPS

(57) Abstract: A connector for detachably interconnecting a number of strips (3), each of which has at least one perforation (4) and which in at least one mutual connection position is flush with the perforations (4) in the other strips (3). The connector (1,10,16,21,26,31,36) comprises at least one pin (6,20,25,30,37) and at least one hook (5,8,9;11,14,15;17,18,19;22,23,24;27,28,29) attached to the at least one pin, the at least one pin is engaging the flush perforations in the strips in the connected state of these at the same time as the at least one hook is encompassing the strips, and the strips are detachably interconnected only by means of said at least one pin and said at least one hook. The connector has a simple construction and is able to easily and quickly connect two or more strips immediately in positions where co-operating perforations are flush with each other without the need to first pass the strips through the connector.
